Where international, state, county, and/or MCD/CDD boundaries coincide, the map uses the boundary symbol for only the highest ranking of these boundaries.

Geographic area names are followed by either their FIPS or census code.

- 1 "A" * following an MCD name denotes a false MCD "A" * following a place name indicates that a false MCD exists with the same name and FIPS code as the place; the false MCD label is not shown.
- 2 Place label color corresponds to the place color filter.
- 3 Census tracts are identified by an up to four-digit integer number and may have an optional two-digit suffix; for example 23 or 1457.02. The census tract codes consist of six digits with an implied decimal between the fourth and fifth digit corresponding to the basic census tract number, but with leading zeros, and trailing zeros for census tracts without a suffix. The tract number examples above would have codes of 002300 and 145702, respectively.

Due to space limitations, some road names, along with other feature and geography names on the map, may not be shown.
